

## **INFORMATION ON HEATING SYSTEM**

The boiler for the heating system can be found in the boiler room which is located off the kitchen on the left-hand side.

Identify the circular timing controls of which there are two. The heating system timer is on the **LEFT**. On the outside casing at about ten to, you will find a little red button which once pressed will give you two hours of heating. Once pressed a red light will appear on the dial and the boiler will kick in. This instruction will need to be followed again after the two hours if required.

**THERE IS NO NEED TO SWITCH THE HEATING OFF AS IT SHUTS OFF AUTOMATICALLY**
